Katie Hafner

I work with the Historical Collection of obsolete PR office photos. They are arranged by MIT person or project.

I will fax to you samples of photos from the collection. We can discuss their suitability to your project on the history of the Internet and how you can obtain copies.

If it is of any help - we have most of the photos used in A CENTURY OF ELECTRICAL ENGINEERING AND COMPUTER SCIENCE AT MIT 1882-1982 by Karl L. Wildes and Nilo A. Lindgren. Lincoln Laboratory maintains their own photo collection.
